

CFDs on Commodities - Key Information Document
Everything You Need To Know About CFDs on Commodities

Tickmill Europe Ltd

February 2024

Purpose: This document provides you with key information about this investment product, specifically Contracts for Difference (CFDs) on Commodities. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product as well as relevant performance information and to help you compare it with other products.

General Information: Tickmill Europe Ltd ('Company') manufactures and distributes CFDs. More information on the company and contact details can be found on <https://www.tickmill.eu/corporate-contacts/>. The Company is authorised and regulated by the Cyprus Securities and Exchange Commission ('CySEC') (license no. 278/15).

YOU ARE ABOUT TO BUY A PRODUCT THAT IS NOT SIMPLE AND CAN BE DIFFICULT TO UNDERSTAND.

Product: What is this product?

Type: A CFD is a leveraged contract entered into with the Company on a bilateral basis. It allows an investor to speculate or hedge on rising or falling prices in an underlying commodity through online trading platforms. An investor has the ability to buy (or go "long") the CFD to benefit from rising underlying commodity prices; or to sell (or go "short") the CFD to benefit from falling underlying commodity prices or not trade at all. The price of the CFD is derived from the price of the underlying commodity price. For instance, if an investor is long in a CFD and the price of that underlying commodity rises, the value of the CFD will increase and when the contract can be closed at profit the Company will pay the difference between the closing value of the contract and the opening value of the contract. Conversely, if an investor is long and the cash price of the underlying commodity falls, the value of the CFD will decrease; if the contract is then closed, the client will be debited with the difference between the closing value of the contract and the opening value of the contract. The use of leverage with CFDs has the effect of magnifying both profits and losses.

Objectives: Allows you to speculate on the price movement of an exchange rate or CFD without ever taking delivery of the underlying commodity over any period. The spread, financing and price movement all determine its profitability.

The objective of the CFD is to allow an investor to gain leveraged exposure to the movement in the value of the underlying commodity (whether up or down), without actually needing to buy or sell the underlying commodity. The exposure is leveraged since the CFD only requires a small proportion of the contract value to be deposited as initial margin and is one of the key features of trading CFDs.

CFDs do not have an expiry date and are therefore open-ended; hence there is no recommended holding period and it is at the discretion of each individual investor to determine the most appropriate holding period based on their own individual trading strategy and objectives.

Target Retail and Professional Investor: Small to large scale retail and professional investors with knowledge and experience of the industry who feel comfortable trading complex financial markets and who want to trade with money they can afford to lose and have high risk tolerance. Prospective clients should understand how the prices of CFDs are derived, understand the impact of and risks associated with margin trading, its key concepts along with leverage and the potential to bear losses that may be equal to their total deposits. Trading CFDs offer access to a range of markets. When trading CFDs, you have the potential to diversify your trading strategies as well as taking advantage of different opportunities across global markets.

Commodity	Trading Hours
ALUMINIUM - LEAD	Mon -Fri: 03:00 - 21:00
NIKEL	Mon -Fri: 10:00 - 21:00
BRENT	Mon-Thur: 03:00 - 23:59; Fri: 03:00-23:58

What are the risks and what could I get in return?

1 2 3 4 5 6 7

← Lower risk Higher risk →

! This risk indicator is a guide to the level of risk of CFDs compared with other financial products. It shows how likely this product will lose money because of market movements. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

Trading CFDs on margin carries a high level of risk and may not be suitable for everybody. The high degree of leverage can work for or against you due to market movement. In addition to this product: foreign exchange risk, market risk, leverage risk, market disruption risk, online trading platform, IT risk, and liquidity risk. Before deciding to trade CFDs, you should carefully consider your trading objectives, level of experience and risk appetite. Trading CFDs requires you to maintain a certain level of funds in your account to keep your positions open. It is possible for you to sustain losses equal to your investment (deposit), therefore you should not deposit money that you cannot afford to lose and if there is a sudden adverse movement in the market you may be required to deposit additional funds at short notice. You should be aware of

all the risks associated with CFDs and seek independent advice if you require further clarification. Please ensure you fully understand the risks and take appropriate care to manage your risk.

Performance Scenarios

***Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.**

The different scenarios show what you might get back in different market circumstances, and it does not take into account the situation where we are not able to pay you. This key information document applies to any CFD. For each trade you enter, you will be responsible for choosing the CFD instrument, when you open and close, the size of the trade (risk) and whether to use any risk mitigation features (such as stop loss orders).

Assumptions

Scenarios

Commodity CFD (held intraday)		Buy Performance scenario	CLOSE price	Price change	Profit/Loss	Sell Performance scenario	CLOSE price	Price change	Profit/Loss
Commodity opening price (€)	1300.00	Favourable	1319.50	1.50%	1950.00	Favourable	1280.50	1.50%	1950.00
Trade Size (per CFD)	1 lot (100 units)	Moderate	1306.50	0.50%	650.00	Moderate	1293.50	0.50%	650.00
Margin %	5.00%	Unfavourable	1280.50	-1.50%	-1950.00 *	Unfavourable	1319.50	-1.50%	-1950.00 *
Margin Requirement (€)	6500.00	Stress	1235.00	-5.00%	-6500.00 *	Stress	1365.00	-5.00%	-6500.00 *
Notional value of the trade (€)	130000.00	*The loss is restricted to your account balance as we offer negative balance protection.							

What happens if the Company is unable to pay out?

In the unlikely event that the Company was to go into liquidation and we are not able to pay you what is owed, you could lose your entire investment. However, the Company segregates all client funds from its own money in accordance with CySEC's Safeguarding of Clients' funds rules. Furthermore, the Company is a member of the Investor Compensation Fund ("ICF") for the Clients of Cyprus Investment Firms ("CIFs"), under the Provision of Investment Services, the Exercise of Investment Activities, the Operation of Regulated Markets and Other Related Matters Law 87(I)/2017, as subsequently amended from time to time ("the Law"). In such case, the ICF will protect eligible clients to a maximum of 20,000 EUR per client. See [here](#) for more details.

What are the costs?

Trading a CFD on an any underlying commodity within Tickmill Europe Ltd incurs the following costs:

CFDs on Commodities					
	Type of Cost	Classic	Pro	VIP	Description
Spread	One-off	From 1.6	From 0.0	From 0.0	The difference between the buy (Ask) price and the sell (Bid) price. When a position opens, the spread "cost" is realised. Traders should note that in the event of low liquidity, spreads might significantly increase from their normal levels.
Swaps	Recurring	**	**	**	*SWAPs are determined by the overnight interest rate of each currency; the overnight rate is the interest rate that the banks would in theory lend and borrow from each other. A swap fee is charged when a position is held overnight. As an example, for FX, the swap charge is the interest rate differential between the two currencies of the pair. ** SWAPs can be seen on our website: https://www.tickmill.eu/conditions/spreads-swaps and in our platform. We are adding Mark up on that overnight interest rate (SWAPs).
Commission	One-off	0	2* per side per 100k traded	1* per side per 100K traded	A commission "cost" is based on volume transaction and is one charge for both opening and closing a position. Example: On Pro Account, If you trade 1 lot of EURUSD, which has a contract size of 100,000 EUR, then your commission per side would be 2 EUR and 4 EUR round turn. There are no commissions cost for trading Oil.

Compound effect of costs	Long/Short	Instrument	Volume (lots)	Spread in ticks	Spread value in Euro	Commission	Swaps 1 night	P/L	Net Profit	Total Costs	Percentage of Costs on Return
Classic	Long	WTI	1	10	-0.09	0	-0.0166	€1.00	€0.89	€0.11	10.75 %
Pro	Long	WTI	1	4	-0.04	0	-0.0166	€1.00	€0.95	€0.05	5.30 %
VIP	Long	WTI	1	4	-0.04	0	-0.0166	€1.00	€0.95	€0.05	5.30 %

Liquidation Level

Any open positions you have on your account may be automatically closed if your available funds fall below 50% of the required margin to maintain those positions open.

How long should I hold it and can I take money out early?

There is no minimum period that you must keep this investment open and you can open and close it at any time while the market is open. You can request a withdrawal of available funds on your account during normal working hours and this will be processed the same working day or the next working day. There is no recommended holding period, no cancellation period and therefore no cancellation fees. However, overnight funding cost can eat away at long term exposures.

How can I complain?

If you have complaint, you should submit a Complaint Form to the Complaints Management Function of the Company by email at complaints@tickmill.eu or by post at our address: Kedron 9, Mesa Geitonia, 4004 Limassol, Cyprus or by Facsimile at 0035725247651. They will then issue you with an initial acknowledgment receipt of your complaint which will include a unique reference number for your complaint. The complaints management function will investigate your complaint and provide you with a final decision within 2 months of the complaint receipt. A copy of the Firm complaints procedure can be found [here](#). If you are not satisfied with the final decision you can submit a complaint to the Financial Ombudsman (<http://www.financialombudsman.gov.cy>).
